

ERNC Field Trip Offerings

Every person is welcome at the Eagle River Nature Center. We believe that every person regardless of ability can and should have an informative and positive experience. We are happy to adapt our program to meet the needs of students—please let us know how we can best help each student to have a great visit!

The standard field trip is 2 hours of instructional time. Field Trips involve a brief introduction in the main building and then a ¼ mile hike around the Rodak Trail. If you're looking for a longer field trip, different topic, or more focused field trip please contact the naturalists for more details.
